With **TruBlend XT**, you'll see your true colors

# TruBlend™ XT

Ultrablend's TruBlend XT is not only the most accurate color dispenser on the market, it's also the fastest. Its smart design and revolutionary ColorCreator™ software enable it to dispense colorants with remarkable precision in even the smallest quantities, eliminating formula scaling and rounding issues and ensuring color repeatability across machines.

And with simultaneous dispensing, quick can alignment with its Bombsight™ locator, and the fastest can-to-can dispensing times in the industry, TruBlend won't slow you down. Add to all this ColorCreator's onboard diagnostics and maintenance capabilities and you have an advanced tinting solution that incorporates Ultrablend's legendary reliability.

Stainless steel canisters

## Accuracy

TruBlend XT dispenses colorants in quantities as small as 1/384th of a fluid ounce with less than 1% error. This unprecedented level of accuracy not only creates precise color matches, but also ensures color repeatability across tinting stations and eliminates formula rounding issues when tinting smaller cans. And ColorCreator's advanced calibration functions help maintain TruBlend's accuracy over time.

## Speed

With the fastest can-to-can dispensing times in the industry, TruBlend helps boost productivity. Simultaneous dispensing from up to 16 circuits and no ramp-up time between cans means TruBlend works as fast as you do. And ColorCreator's multi-can job scheduling and support of one-touch operation for repeat dispenses means you can work faster than ever before.

## Foolproof Design

Most mistints are due to operator error, and TruBlend XT eliminates the most common causes. Can sensors ensure that the right can is in place before dispensing a formula. And the Bombsight alignment tool eliminates mistints caused by colorants dispensing onto can lids. ColorCreator's user-friendly interface guides operators through formula selection and job scheduling, eliminating common entry errors. And as an additional safeguard, TruBlend XT's optional bar code reader automatically selects the correct base and formula options with a swipe of the can.

## Ergonomics

TruBlend XT's smart design and easily accessible controls take ergonomics to the next level. The Bombsight locator allows you to easily align 5-gallon pails without crouching, and the monitor and keyboard are positioned within easy reach. TruBlend XT's roll conveyor is situated at the proper loading level to eliminate discomfort or injury from moving heavy pails. And even service and maintenance are trouble-free with easy-to-fill canisters and quick-release body panels that open with a touch to allow unobstructed access.

### Revolutionary Software

Ultrablend's revolutionary ColorCreator software is easy to use with minimal training, yet offers unprecedented functionality and features. Users can choose between interface screens based on their experience—new users can utilize a simple interface that walks them through formula selection and dispensing, while experienced operators can access more powerful screens that maximize flexibility and speed. Other ColorCreator highlights include:

- Interfaces with leading color-matching systems
- Search or schedule jobs while dispensing is in progress
- SmartService™ advanced diagnostic capabilities
- Advanced calibration functions
- Tracking of customer purchasing and tinting histories
- Easy call-up of previously dispensed custom formulas

#### ColorCreator supports the following optional modules:

- Reporting Package** > Makes full use of ColorCreator's advanced tracking capabilities by generating reports ranging from customer-specific inquiries to complete histories of all cans dispensed
- Bar Code Reader** > Simplifies formula entry and selection by allowing use of a bar code system to control bases and tinted cans
- Label Writer** > Improves point-of-sale functionality and customer tracking by generating can labels with information that includes formula, date and other customizable fields

### Reliability

TruBlend XT incorporates the highest quality components to provide years of trouble-free operation and non-degrading accuracy. And its SmartService feature will automatically prompt you when service is needed, eliminating potential downtime due to component failure, and allowing you to schedule maintenance when convenient.

Flip-down 1-gallon shelf

5-gallon roll conveyor

### Longest Warranty Available

TruBlend XT comes with the industry's longest and most complete warranty: 1 year full warranty (parts and labor) and 2 year pump warranty (parts only)

## Specifications

### TruBlend XT

Canister Height >	42"
Monitor Height >	48.5"
Conveyor Height >	12"
Depth >	27"
Depth w/Conveyor >	40.5"
Width >	64"
Weight >	450 lbs.
Capacity >	Up to four 5-gallon canisters Up to twelve 3-gallon canisters
Options >	Bar Code Reader Label Writer Reporting Package

TruBlend XT is available in configurations with up to 16 circuits
