

TruMix™
CM

Add the durability of TruMix CM to your mix

TruMix™ CM

Ultrablend's TruMix™ CM is the fastest, most versatile and most durable vibrational mixer on the market today. Whether you're mixing a single 5- or 1-gallon pail, or cases of gallons, quarts or pints, TruMix's fast, effective mixing motion gets the job done quickly and reliably, with excellent color integrity every time.

Heavy duty construction

Sturdy sliding door

Stainless steel loading platform with rollers

Versatility

The versatile TruMix CM handles cans of all shapes and sizes—from 5-gallon pails to pint cans—allowing you to meet all your mixing needs with one compact solution. And TruMix CM easily handles cases, providing you with a quick and efficient way to mix multiple cans at the same time to speed up your paint sales.

Durability

The TruMix CM is designed for rugged, long-term use. Every aspect of the TruMix CM has been carefully engineered to provide years of trouble-free operation.

- Sturdy, balanced frame ensures long life
- Heavy-duty shock absorbers minimize stress to mixer
- Fully-enclosed motors are spill-proof and eliminate problems caused by dust, dirt and humidity
- Lifetime-sealed bearings never need lubrication or cleaning

Reliability

The TruMix CM features SmartService™, an intelligent suite of onboard diagnostics and maintenance electronics that help keep it up and running. SmartService's maintenance alerts help you avoid breakdowns at busy times by planning service when it's convenient. And its failure alerts signal problems that may not be obvious to the operator, preventing damage to the mixer and time-consuming cleanups. SmartService also runs a self-cleaning cycle that helps prevent clamping failures.

Safe and Effective Clamping

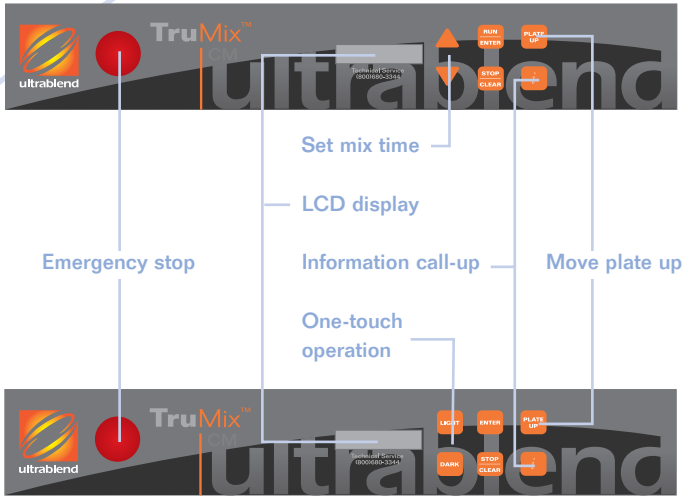

TruMix CM's revolutionary SmartSense™ automatic clamping system eliminates the problem of thrown and crushed cans. SmartSense's advanced logic always applies the right clamping strength, no matter the can size. This means you can rely on the TruMix CM to work reliably without need for periodic field adjustment. And with failure alerts that prevent unsafe operation, sensors that shut down the mixer if the door is opened, and a sturdy door that easily contains loose cans, TruMix CM is the safest case mixer available.

New Digital Panel

TruMix CM comes standard with a durable, spill resistant digital panel that provides a user-friendly operator interface. The new digital panel comes in the two optional configurations shown below:

The Time Select option allows the operator to select mix time in increments and offers maximum flexibility for experienced operators.

Time Select

Preset Time

The Preset Time option offers one-touch operation of two pre-selected mix times to simplify mixing jobs for inexperienced operators.

Both panel options provide unprecedented feedback, including detailed tracking of usage by cycle, time and can size. This useful feedback lets the store manager know which machines get the most use and helps diagnose color problems.

Easy Loading

Loading the TruMix CM is safe and easy. A stainless steel loading platform with built-in rollers allows slide-in loading of even the heaviest pails, reducing operator strain and speeding up your line. And the TruMix CM has a door that slides upwards to open, which means it won't interfere with your roll conveyor and allows easy loading from any direction.

Efficiency

TruMix CM doesn't require a dedicated power line, saving you the expense and inconvenience of having one installed. And its low energy draw will save you loads of money on your power bills over the long haul. TruMix CM also features a small footprint, giving you maximum performance in a minimal amount of space.

Longest Warranty Available

TruMix CM comes with the industry's longest and most complete warranty: 1 year full warranty, parts and labor.
